

1. Using "Scanner", for insert (Dictionary-2017.txt).
2. Read every row true "FileInputStream", "BufferedReader" and "InputStreamReader", and put it in ArrayList<String> (create massive ArrayList object).
3. Preparing Boolean method for deciding if new word can be added in chain
4. Using loop's that every turn start with different word, and on that word trying to build longest chain.
5. Dancing algorithm are implemented.
